

RS-PT10

(TK4100)

RFID PVC Card

RS-PT10 (TK4100) RFID PVC Card

This RFID PVC/PET Tag operate in UHF frequency band, it is widely used for many applications, such as Parking System Management, Production Line Management, Access Control System.

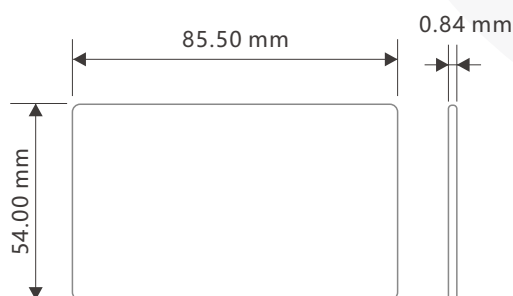

Specification

Physical Features	
Material	PVC, without coating layer
Color	White
Dimensions	85.5x54×0.84mm
Working Temp	-20~ +55℃
Storage Time	Up to 10 years

RFID Features	
RF Protocol	ISO7815
Response Frequency	125KHz
Chip Type	Tk4100
Memory	64bit EEPROM
Read Range	3~5m (depends on different readers)

Dimensions

Other Features	
Data Storage	Up to 10 years
Package	200pcs/box
Encapsulation Form	Card type
Application	book and archive management, road automatic toll collection, access control cards, membership cards, city one cards, other ID cards
